CALICO® M•100

THE ULTIMATE WEAPON

The American Industries' Calico M•100 is truly the ultimate weapon and the greatest advance in firearm technology in decades.

The Calico M•100 features a lightweight aluminum alloy frame and a "helical feed" magazine with a capacity of 100 rounds. The magazine is constructed of space age high impact fiber reinforced thermoplastic and can be stored fully loaded without spring fatigue.

An added plus is the silent winder with a spring release clutch that permits rapid loading with no spring resistance. It weighs less per round than most conventional magazines and has two clear "ports" to indicate rounds remaining in the magazine.

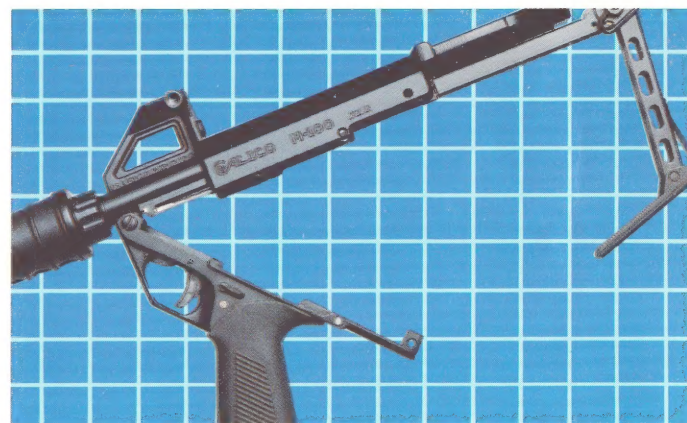

The Calico M•100 has perfect balance . . . the placement of the magazine puts the center of gravity above the recoil which counteracts muzzle lift and improves accuracy.

The Calico M•100 is manufactured to exacting standards of quality, and its rugged simplicity assures functioning under adverse conditions.

The Calico M•100 incorporates quick adjustable sights,

disappearing buttstock, pistol-grip storage compartment, flash-suppressor/muzzle brake and a safety system that can be operated by either right or left handed shooters with equal ease.

Because of the Calico M•100's advanced design, it can be field stripped and reassembled in a few seconds, including removing barrel assembly.

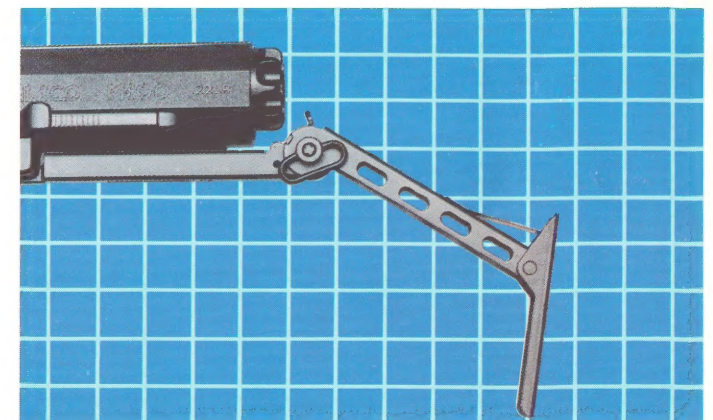

Field strips and reassembles in a few seconds.

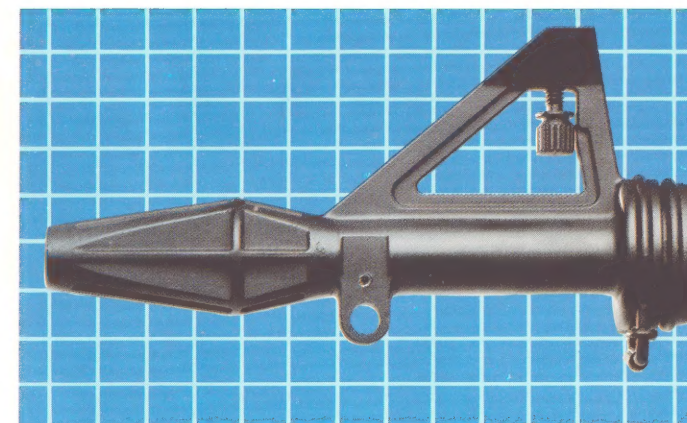

M•100 SPECIFICATIONS

WEIGHT	Carbine, w/o magazine	4.2 lb.	AMMUNITION	.22 lr only	FRONT SIGHT Post, adjustable for elevation
